

# Milestone 5

By Cianna Grummer  
SmartStride

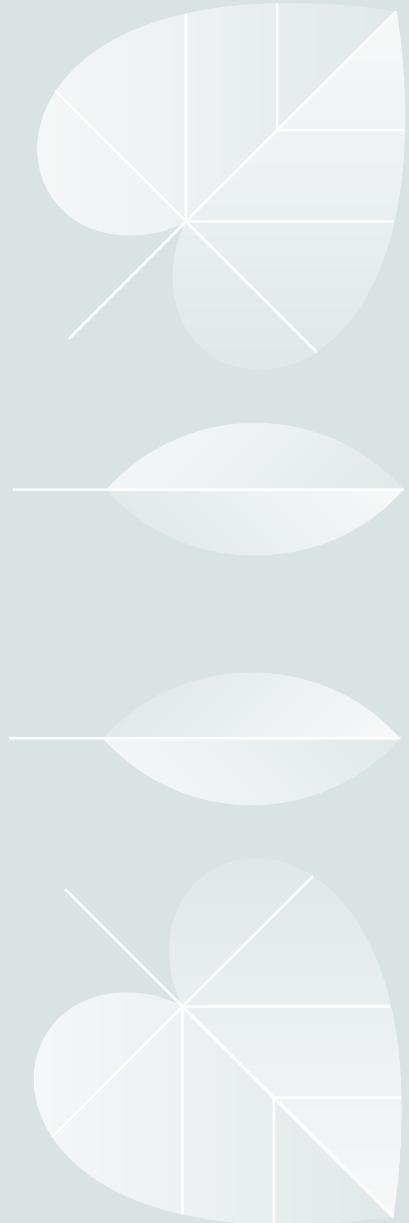

# Milestone 5

<b>Task</b>	<b>Progress</b>	<b>To Do</b>
Define sections	100%	N/A
Create pie chart	100%	N/A
New page for past results	100%	N/A
Create API and Lambda functionalities for pie charts	100%	N/A
Create API and Lambda functionalities for past results page	100%	N/A

# Define Graphs

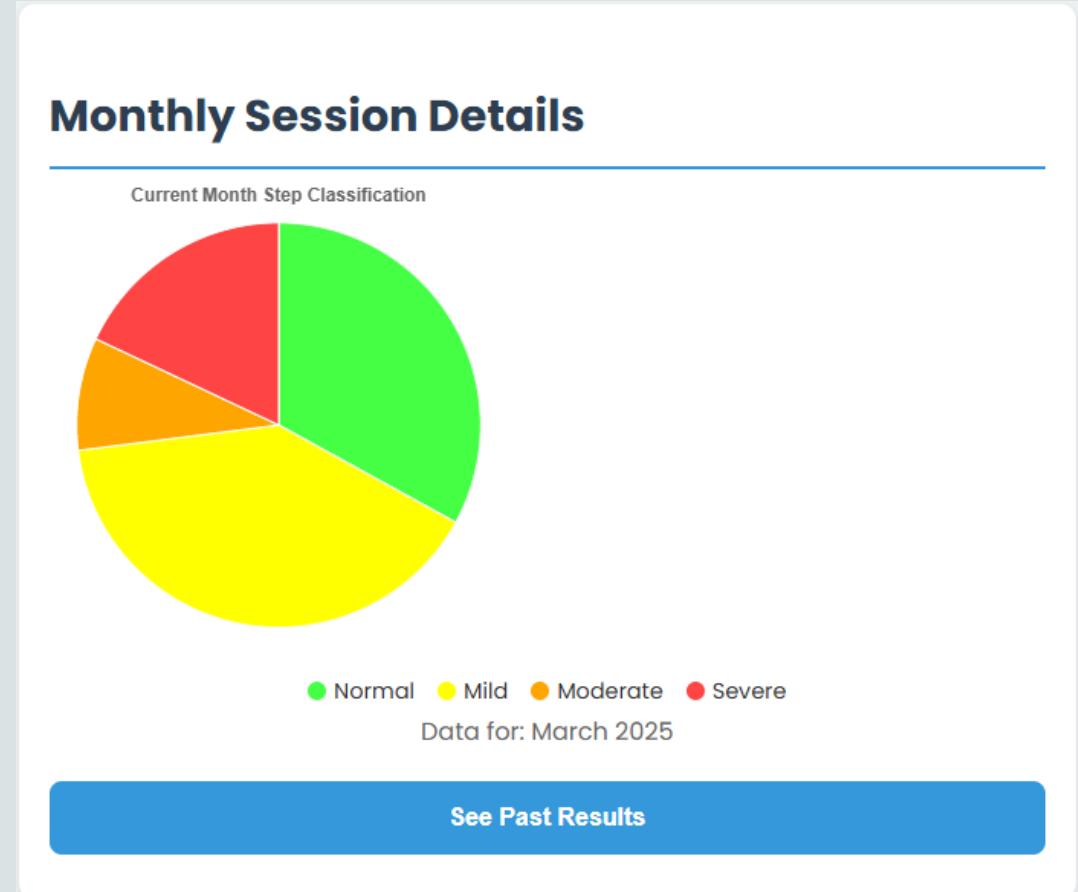

---

- Changes made:
  - Renamed *EMG Analysis* to "*Gastrocnemius EMG Activity*"
  - Remove "*Gait Analysis with step classification*" section
  - *Pie Chart will go under "Monthly Session Details"*
  - Put average *ITW foot angle* under "*Last PT Session Details*" (doctor)
  - *The time series plot showing averages over 1 gait cycle for ITW vs Normal Step (x = time, y = angle (degrees)) (doctor)*

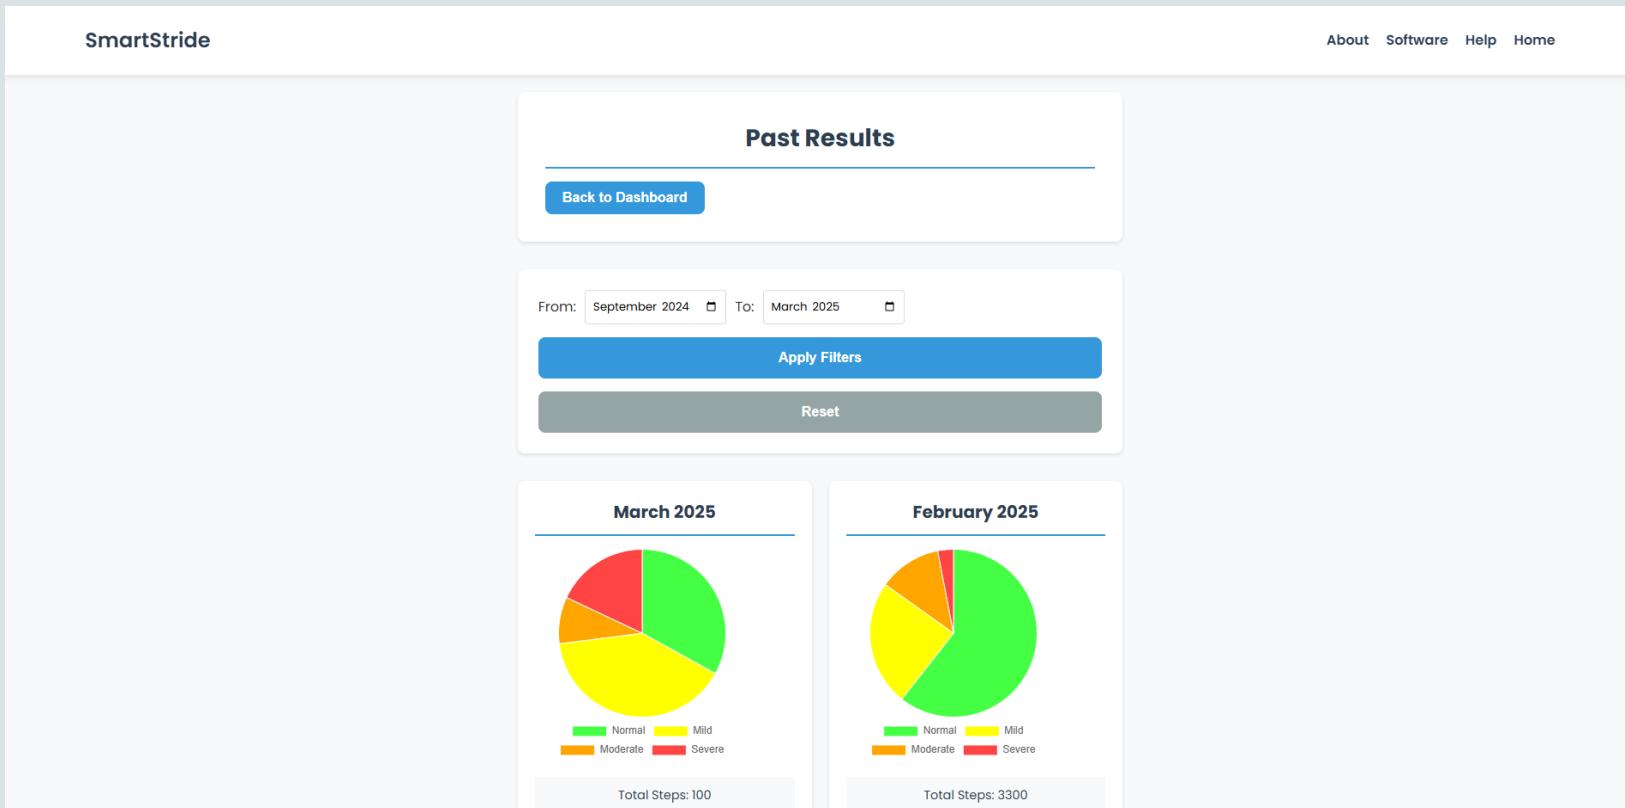

# Pie Chart & Database

- Pie Chart is visible to patient and doctors
  - Created new table in database
    - *Patient\_pie\_data*
  - Created GetPieData Lambda & API
  - Percentage of steps with classification
    - *Normal, Mild, Moderate, Severe*

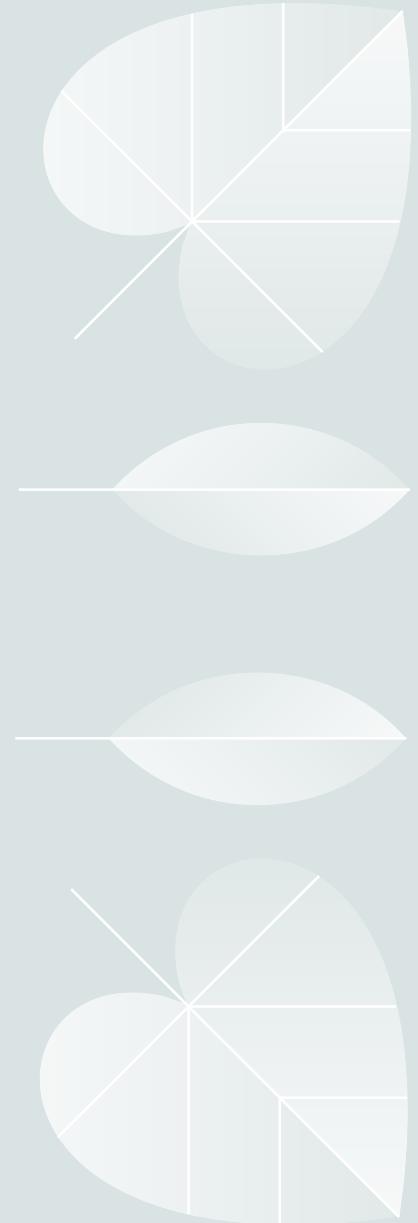

# Past Results Page

- Accessible through “See Past Results” button under the main page pie chart
- Initially shows all patient results
- Can filter by month and year
- Uses the same API/Lambda as main page pie chart

# Milestone 6

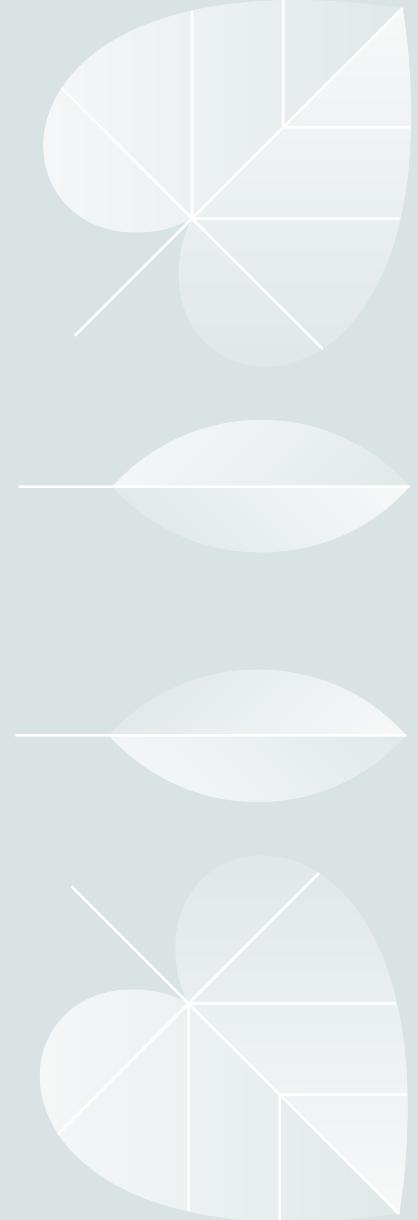

Task	Progress	To Do
User and/or Developer Manual	0%	Create user and/or dev manual
Demo Video	0%	Start creating a demo video
SmartStride Poster	10%	Complete my section in the SmartStride poster
Update User Guide	50%	Talk to SmartStride team to create a user guide for device
Update About Us Page & Home Page Description	30%	Work with SmartStride to create a more accurate description
System Testing & Evaluation	15%	Create a user survey, find testers, conduct login and data testing

# User and Developer Manual

---

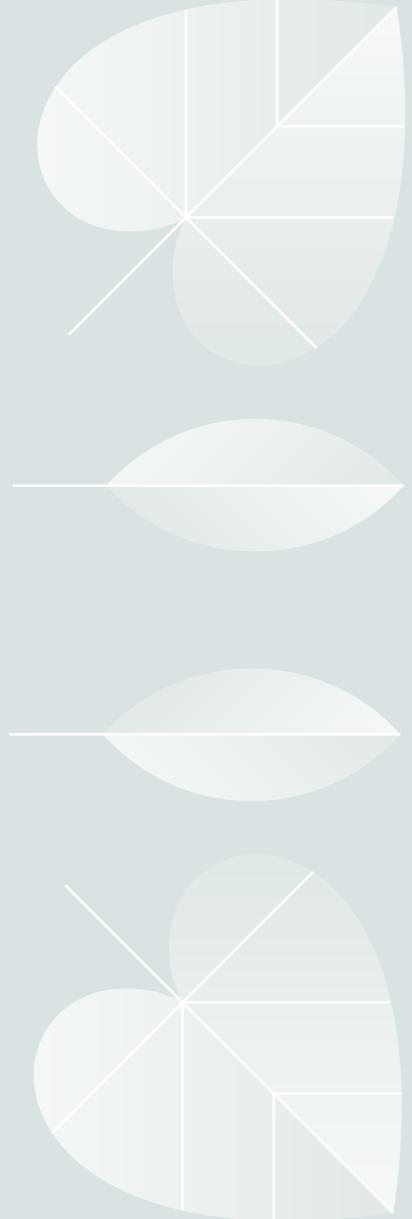

- User Manual
  - *Two user types patient and clinician*
  - *Shared sections: Sign-up, Log-in, Device Guide*
  - *Patient sections: Raspberry Pi app guide, manual upload, reading pie charts and severity bar*
  - *Clinician sections: Adding/dropping patients, viewing patient data, editing patient goals*
- Developer Manual:
  - *Diagrams and explanations of website structure, database structure, AWS tools (API, RDS, CloudWatch etc.)*
  - *How to guide for accessing the database using VCP security groups*

# Demo Video

---

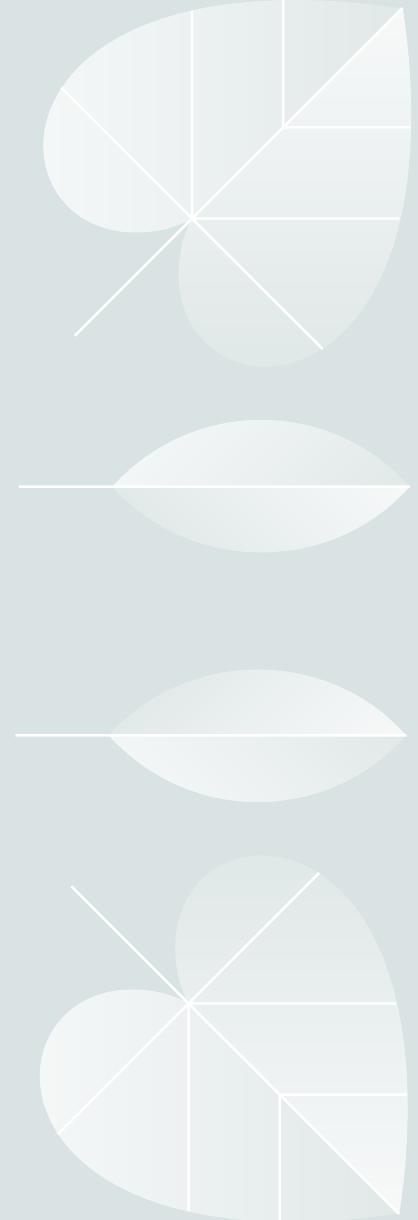

- Will show key website features:
  - *Sign-up and Log-in*
  - *Uploading data*
  - *Patient & clinician dashboards*
  - *Past results with filters*
  - *Raspberry Pi app*
  - *Real time updates when uploading data*

# Updating User Guide, About Us, and Home Page Descriptions

---

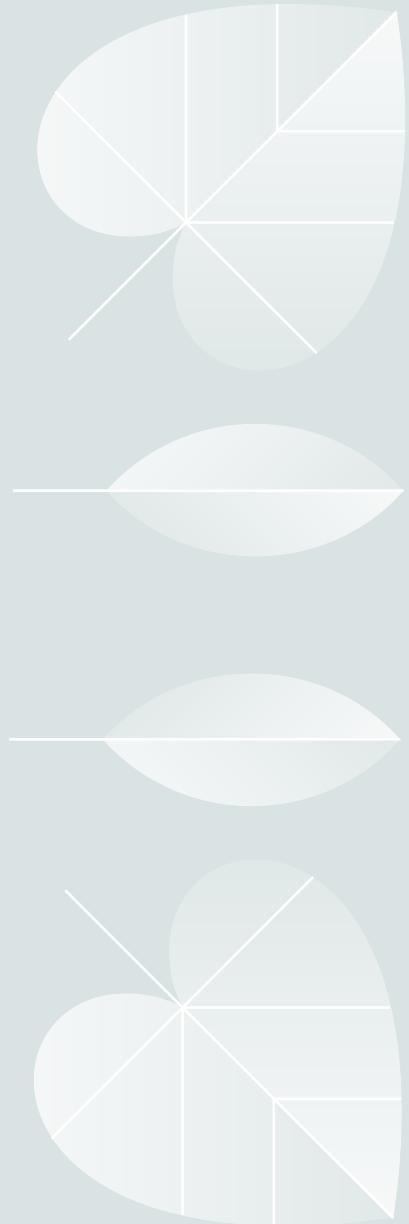

- User Guide Page:
  - *Currently has minimal information*
  - *Will include:*
    - SmartStride device instructions
    - Raspberry Pi app instructions
    - User manual for patients and clinicians
- About us page and home page
  - *Rewrite to better describe the SmartStride device and website*
    - What it is used for
    - Why it was made

# System Testing & Evaluation

---

- Three evaluation categories:
  - *Usability*
    - User survey to be completed after completing number of tasks
      - *"How easy was it to find the sign-up page?" (1-5 stars)*
      - *One open ended feedback section*
  - *Reliability*
    - Test data upload and login success rates
      - *Data upload: 99% ideal, 95%-98% acceptable, <95% needs improvement*
      - *Login success rate: 99% ideal, 90%-98% acceptable, <90% unacceptable*
  - *Accuracy*
    - Compare data uploaded to original data
    - Get success rate from comparing number of uploads to number of uploads where data matches

Questions?
